

Blue Cross Blue Shield of Illinois MMAI Quality Improvement Program

The Quality Improvement Program (QIP) helps you get the care and services that you need when you need it. At the end of every year, we look to see how well we did in meeting those goals.

The goals of the program are to:

- Help you get health care, behavioral health care, and services when you need it
- Have Member Services get answers to your questions and concerns quickly
- Help you get health care and behavioral health care in the right place
- Help you get information on and access to services for your well-being and chronic illness
- Help you get your medicines
- Help you when there are incidents that can affect your safety, health, and well-being;
- Make sure that your behavioral health doctor and other health care providers:
 - Talk to each other;
 - Know your problems and treatment;
 - Know how to refer you to another doctor;
 - Give you the correct medicines for your behavioral health;
 - Make sure that you get a follow-up when you have both a health care and behavioral health care problem;
 - Have a wellness program in place; and
 - Can make sure that you can get assistance from our behavioral health staff if you have severe and frequent mental illness.

During the year, we looked to see if we met our goals. Blue Cross Community MMAI was able to see an improvement in the following:

- Getting the right medicines from your doctor when you have heart disease, diabetes, or after a heart attack
- Helping you to follow up with a doctor after you have been in the hospital for a mental illness
- How well you and your doctor control your blood pressure
- Having your doctor talk to you about:
 - End of life care
 - Your medicines
 - Any pain you are in
- Making sure that you are getting needed care and have enough doctors and specialists to see

We also look to see how we can improve from last year to this year. Areas that we need to work on for this year are:

- Making sure you are taking your medications as ordered by your doctor
- Urging you to get your flu shot
- Recommending you go to the dentist
- Helping women get screenings for breast cancer

- If you smoke, helping you quit smoking
- Helping you control your blood sugar if you have diabetes
- Making sure you get an eye exam if you have diabetes
- Helping pregnant members get care before and after their child's birth
- How well your doctors talk to you in a way you can understand
- Making sure that you are happy with your health care and your doctors
- Making sure that you are getting care quickly and have enough doctors and specialists to see
- Having you complete a health risk assessment
- Making sure that we can continue to answer your complaints and appeals as soon as possible; and
- Making sure our Member Services answer your phone calls quickly
- Making sure transportation services are readily available to you
