

ETR3 Header Definitions

Field	Definition
HDR-RECORD-IND	A one-byte field populated with a value of “H” which indicates a header record on the BCBSIL transmitted file.
HDR-LABOR-FUND-NAME	A unique ID assigned to each Fund by BCBSIL (e.g., LABOR999).
HDR-PRODUCTION-DATE	The actual day the file is created by BCBSIL (format = MMDDYYYY).
HDR-SEQUENCE-NUMBER	The numeric value indicating the order of multiple files in a single transmission.
HDR-VERSION-NUMBER	Indicates the file version a Fund is using. Currently there is only one version for ETR3 identified as “001.”

ETR3 Trailer Definitions

Field	Definition
TRL-RECORD-IND	A one-byte field populated with a value of “T” which indicates a trailer record on the BCBSIL transmitted file.
TRL-LABOR-FUND-NAME	A unique ID assigned to each Fund by BCBSIL (e.g., LABOR999).
TRL-PRODUCTION-DATE	The actual day the file is created by BCBSIL (format = MMDDYYYY).
TRL-RECORD-COUNT	The total number of records contained between the header and trailer record of a transmission file.
