

## Commonly Prescribed Maintenance Medications

Maintenance medications are those drugs you may take on a regular basis to treat conditions such as high cholesterol, high blood pressure or diabetes. Depending on your benefit plan, you may have coverage to obtain up to a 90-day supply of covered maintenance medication delivered to you through PrimeMail®.\*

Using PrimeMail to obtain covered maintenance medications may save you time and money: Your medications will be delivered directly to you, to the address of your choice. To receive coverage, your pharmacy options for obtaining maintenance medications may vary depending on your particular benefit plan. For example, some plans require that maintenance medications be obtained through PrimeMail in order to receive coverage. With many plans, a higher out-of-pocket payment amount applies when prescription medications are obtained at an out-of-network pharmacy. See your benefit booklet for information about your particular plan.

Commonly used maintenance medications are listed below. This list is not all-inclusive and may change from time to time.

Generic drugs are available for many of the brand drugs listed. Generic equivalents may not be available in all strengths for every product noted as having a generic.

Please note that oral contraceptives are maintenance medications and are part of this list. However, this list does not include the trade names of all available oral contraceptives because there are a large number of products.

Coverage is always subject to the exclusions and limitations noted in your benefit plan booklet. For details about your plan, check your benefit booklet or call the Pharmacy Program number on the back of your member ID card.
