

Over the Counter Equivalent Exclusion Program

BlueCross BlueShield of Illinois

Experience. Wellness. Everywhere.™

The prescription brand and generic drugs in the two left columns below may not be covered under your prescription drug benefit plan. If not, you can still purchase these prescription medications, but you will be responsible for the full cost. You may save money by choosing to purchase a product with the same active ingredient(s) that is available over the counter (OTC). These OTC options are listed in the third column below. Cost is only one factor in selecting a medication. Before making any changes to your current medication regimen, talk to your doctor about what is right for you.

Non-Covered Prescription Brand and Generic Drugs [†]		OTC Products with Equivalent Active Ingredients [§]	
These drugs are typically <u>not</u> covered. For questions about specific drugs, call the Pharmacy Program number on the back of your ID card.
