

2015 ABBVIE DRUGS COVERED AT 100%

If you're interested in switching to an AbbVie drug, discuss with your doctor whether the drug is appropriate for you.

ANTI-INFECTIVES	Antibiotics for the treatment of bacterial respiratory infections and skin infections.
Biaxin® ✦ ◆	Oral macrolide antibiotic for the treatment of certain upper and lower respiratory tract infections. Biaxin is also used for skin and skin structure infections and for the treatment and prevention of Mycobacterium avium complex (MAC). Also used in combination with other medications to eliminate the ulcer-causing bacterium H. pylori.
Biaxin XL® ✦ ◆ (extended-release formulation)	Oral macrolide antibiotic for the treatment of upper and lower respiratory tract infections.
CARDIOVASCULAR	Includes anti-hypertensive medicines for reducing high blood pressure and medicines for treating cholesterol problems.
Advicor®	A fixed dose combination of Niaspan and lovastatin, indicated for the management of lipid abnormalities (LDL, HDL and triglycerides) as an adjunct to diet and exercise when treatment with both Niaspan and lovastatin is appropriate.
Mavik® ✦	An angiotensin-converting enzyme (ACE) inhibitor used for the treatment of high blood pressure (hypertension) and to treat patients who have heart failure in the first few days following a heart attack.
Niaspan®	Used along with diet to raise HDL (good) cholesterol and lower LDL (bad) cholesterol and triglycerides in people with abnormal cholesterol levels. Reduces the risk of recurrence of nonfatal myocardial infarction (heart attack) in patients with a history of heart attack and high cholesterol. In patients with coronary artery disease and high cholesterol, it is used in combination with another cholesterol medication (colestipol, cholestyramine) to slow down or reduce atherosclerosis, the hardening of coronary arteries due to plaque buildup.
Simcor®	A fixed dose combination of Niaspan and simvastatin, indicated for the management of lipid abnormalities (LDL, HDL, and triglycerides) as an adjunct to diet and exercise when treatment with either Niaspan alone or simvastatin alone are considered inadequate.
Tarka®	Angiotensin-converting enzyme (ACE) inhibitor in combination with a calcium channel blocker used for the treatment of high blood pressure when other measures have failed.
Teveten® and Teveten® HCT	Teveten and Teveten HCT are angiotensin II receptor blockers (ARBs) that may be used alone or in combination with other antihypertensives for the treatment of high blood pressure.
TriCor®	Used along with diet to reduce triglycerides and LDL cholesterol, and to increase HDL cholesterol.
Trilipix®	Used along with diet to lower triglycerides and LDL cholesterol, and increase HDL cholesterol. Also used along with diet to lower triglycerides and increase HDL cholesterol in people who are at high risk of heart disease and are taking a statin medicine to control their LDL cholesterol.
ENDOCRINOLOGY	Medicines used to treat hormone related conditions in men, women and children
AndroGel® ◆	A topical testosterone gel for replacement therapy in adult males who have low or no testosterone
Lupron Depot® ◆	A synthetic hormone used for the palliative treatment of advanced prostate cancer. Used for the management of endometriosis. Used for the preoperative treatment of anemia associated with uterine fibroid tumors in combination with iron.
Lupron Depot PED® ◆	A synthetic hormone used for the treatment of central precocious puberty in children.
Prometrium® ◆	A hormone (progesterone) used in the prevention of endometrial hyperplasia in non-hysterectomized postmenopausal women who are receiving conjugated estrogens tablets. Also indicated for use in secondary amenorrhea.
Synthroid® ✦ ◆	Synthetic thyroid hormone for the treatment of hypothyroidism and subclinical hypothyroidism.

✦ Has a generic substitute. Generic substitutes are not covered at 100%.

◆ For participants in the UHC High Deductible Choice Plus, 100% coverage after the plan's annual deductible is satisfied.

GASTROINTESTINAL	Medicines used to treat conditions or symptoms related to the digestive system.
Creon® ♦	A pancreatic enzyme medicine used to improve food digestion in people who cannot digest food properly because of exocrine pancreatic insufficiency due to cystic fibrosis, chronic pancreatitis, pancreatic surgery or other conditions.
Marinol® ♦	A medicine used to treat appetite loss associated with weight loss in people with AIDS. Also used to treat nausea and vomiting associated with cancer chemotherapy in patients who have failed to respond adequately to conventional treatments.
IMMUNOLOGY	Medicines used to treat diseases of the immune system, including Crohn's Disease, rheumatoid arthritis and psoriatic arthritis.
Humira® ♦	Self injection in a class of medications called tumor necrosis factor (TNF) inhibitors. Used alone or with other medications to relieve the symptoms of certain autoimmune disorders (conditions in which the immune system attacks healthy parts of the body and causes pain, swelling, and damage) including the following: Rheumatoid arthritis, Crohn's disease that has not improved when treated with other medications, ankylosing spondylitis, psoriatic arthritis and chronic plaque psoriasis.
Gengraf®	Use for the prevention of organ rejection in kidney, liver, and heart allogeneic transplants. Used for the treatment of patients with severe active, rheumatoid arthritis where the disease has not adequately responded to methotrexate. Used for the treatment of adult, nonimmunocompromised patients with severe (i.e., extensive and/or disabling), recalcitrant, plaque psoriasis who have failed to respond to at least one systemic therapy.
NEUROSCIENCE	Medicines used to treat neurological conditions.
Depakote® ✦ Depakote® ER ✦ (extended-release tablets)	Used to treat acute manic episodes associated with bipolar disorder. Used to treat seizure disorders in adults and children 10 years of age and older. Used to prevent migraine headaches in adults.
PAIN CARE	Medicines used to relieve pain
Vicodin® ✦♦	Combination of hydrocodone (an opioid analgesic) and acetaminophen for the relief of moderate to moderately severe pain.
Vicoprofen® ✦♦	Combination of hydrocodone (an opioid analgesic) and ibuprofen (an NSAID) for the short-term (usually less than 10 days) management of acute pain.
RENAL CARE	Includes oral and injectable forms of an activated vitamin D agent developed to treat patients with chronic kidney disease.
Zemplar® ♦	For the prevention and treatment of secondary hyperparathyroidism associated with chronic kidney disease.
VIROLOGY	Medicines to treat HIV-1.
Kaletra® ♦	Protease inhibitor used in combination with other antiretroviral agents for the treatment of HIV-1.
Norvir® ♦	Protease inhibitor used in combination with other antiretroviral agents for the treatment of HIV-1.
Moderiba™ ♦	Used in combination with other medications for the treatment of chronic Hepatitis C virus infection.
VITAMINS	Medicines for the treatment and prevention of hypokalemia
K-Tab® ✦	Potassium chloride (extended release) used for treatment of patients with hypokalemia (low potassium) and for prevention of hypokalemia in patients who would be at particular risk if hypokalemia were to develop.

✦ Has a generic substitute. Generic substitutes are not covered at 100%.

♦ For participants in the UHC High Deductible Choice Plus, 100% coverage after the plan's annual deductible is satisfied.

AbbVie drugs are covered at 100% only in the following medical options for active employees: BCBS PPO Plus, UHC Choice Plus, UHC HRA Choice Plus, UHC High Deductible Choice Plus (100% coverage after annual deductible for certain products). Coverage is not available in insured or retiree medical options. AbbVie reserves the right to change or end this coverage at any time.
