

# **ICD-10 Z Codes**

## for Social Determinants of Health

To help track and address our members' social needs, we encourage you to use Social Determinants of Health (SDoH) ICD-10 Z codes on the claims you submit to Blue Cross and Blue Shield of Illinois. Any clinician can document a person's social needs, including physicians, nurses, social workers, community health workers, case managers or other providers.

#### What Are Social Determinants of Health?

Social determinants of health are the economic, social and environmental conditions beyond health care, and the structures, cultures and technologies that influence a person's health, care and well-being. These non-medical drivers of health **impact health equity**, the fair and just opportunity for everyone to achieve their optimal health.

## **Using SDoH ICD-10 Z Codes**

Each patient brings more to your office than the symptoms they present on the surface. SDoH may affect a patient's ability or willingness to follow their recommended treatment plan. It's important to adopt a "whole-person" approach. Working together, we can help remove barriers to better health and help improve our members' quality of life. With ICD-10 Z code data, we can better understand our members' unique social needs and help connect them with resources.

#### What You Can Do

- Educate staff on the need to screen, document and code data on patients' SDoH needs.
- Ask about SDoH needs. Patients may not know to discuss non-medical issues with health care providers and may need to be prompted.
- Document any SDoH needs and assign the appropriate ICD-10 code to report on claims.
