

2022-2023 Clinical Practice Guidelines

Community Reintegration and Support

Applicable Product

- Medicaid-Medicare Alignment Initiative
- State of Illinois Contract Medicaid IL

Policy:

Blue Cross and Blue Shield of Illinois (BCBSIL) will promote Community Reintegration and Support via an integrated health model consisting of physical health, behavior health, care coordination, pharmacy, social work services, social agencies, and community resources.

Purpose:

The Community Reintegration and Support program has been developed to ensure that individuals between the ages of 18 and 59, interested in moving back into the community from a nursing facility setting, are supported in this process. The goal is to identify the services and supports systems that a nursing home resident may need in order to move into his/her own residence and live independently again.
