

If a conflict arises between a Clinical Payment and Coding Policy ("CPCP") and any plan document under which a member is entitled to Covered Services, the plan document will govern. If a conflict arises between a CPCP and any provider contract pursuant to which a provider participates in and/or provides Covered Services to eligible member(s) and/or plans, the provider contract will govern. "Plan documents" include, but are not limited to, Certificates of Health Care Benefits, benefit booklets, Summary Plan Descriptions, and other coverage documents. BCBSIL may use reasonable discretion interpreting and applying this policy to services being delivered in a particular case. BCBSIL has full and final discretionary authority for their interpretation and application to the extent provided under any applicable plan documents.

Providers are responsible for submission of accurate documentation of services performed. Providers are expected to submit claims for services rendered using valid code combinations from Health Insurance Portability and Accountability Act ("HIPAA") approved code sets. Claims should be coded appropriately according to industry standard coding guidelines including, but not limited to: Uniform Billing ("UB") Editor, American Medical Association ("AMA"), Current Procedural Terminology ("CPT®"), CPT® Assistant, Healthcare Common Procedure Coding System ("HCPCS"), ICD-10 CM and PCS, National Drug Codes ("NDC"), Diagnosis Related Group ("DRG") guidelines, Centers for Medicare and Medicaid Services ("CMS") National Correct Coding Initiative ("NCCI") Policy Manual, CCI table edits and other CMS guidelines.

Claims are subject to the code edit protocols for services/procedures billed. Claim submissions are subject to claim review including but not limited to, any terms of benefit coverage, provider contract language, medical policies, clinical payment and coding policies as well as coding software logic. Upon request, the provider is urged to submit any additional documentation.

Psychological and Neuropsychological Testing

Policy Number: CPCP008

Version 6.0

Enterprise Clinical Payment and Coding Policy Committee Approval Date: March 4, 2020

Effective Date: 3/4/20

Description

The purpose of this document is to clarify the payment policy for covered psychological and neuropsychological testing. Health care providers are expected to exercise independent medical judgment in providing care to patients.

Reimbursement Information:

Guidelines:

- Testing services must be provided or overseen by medical or mental health providers who are licensed in their state of practice to administer, score and interpret psychological testing.
- Unless preauthorization is required, claims should be submitted upon the completion of all testing related services rendered. This includes all activities related to pre-assessment planning, test administration, scoring, and integration of data, report write up and feedback

session. If testing takes place across multiple days, the claim should be submitted at the conclusion of all services.

- Testing comprised solely of brief symptom inventories or screening tests (paper and pencil or computerized) does not qualify as comprehensive psychological testing. When indicated, these services may be billed using brief assessment or automated testing CPT codes. When such testing administered as part of an intake, psychiatric follow up or routine therapy sessions it is not separately payable if another CPT code is being submitted for the same time period.
- Approval for payment is only applicable to standardized tests that are based on published, national, normative data with scoring resulting in standardized or scaled scores.

Guidelines (cont'd):

The following table summarizes expected timeframes for certain categories of evaluation and testing.

Type of Evaluation	Expected Timeframe
Neuropsychological evaluations (inclusive of time for administration, scoring, interpretation and report write up)	8 hours
Psychological testing to determine readiness for a medical procedure (i.e. bariatric surgery, spinal cord stimulation)	3-4 hours
Psychological testing to diagnose uncomplicated AttentionDeficit/Hyperactivity Disorder (combination presentation, predominantly inattentive or hyperactive/ impulsive presentation). Neuropsychological testing for Attention Deficit/ Hyperactivity Disorder is indicated only when there is remarkable evidence of medical or neurological history.	3-4 hours

- Psychological or neuropsychological testing is limited to once per calendar year. More than one claim submission for testing per year may be subject to medical records and a medical necessity review.
 - A minimum of 16 minutes must be provided to report a 30-minute code
 - A minimum of 31 minutes must be provided to report any per-hour code
 - For criteria and exclusions relating to psychological and neuropsychological testing please refer to Medical Policy PSY301.020. For specific test expected timeframes, refer to Appendix A.
