

BLUE REVIEWSM

FOR CONTRACTING INSTITUTIONAL AND PROFESSIONAL PROVIDERS

AUGUST 2015

Our ICD-10 Testing Program Summary

Blue Cross and Blue Shield of Illinois (BCBSIL) has completed end-to-end or "round-trip" testing of electronic claims (837 transactions) submitted with ICD-10 codes with a select group of providers. Enrollment in the ICD-10 Testing Program was open to all interested contracted providers who met necessary prerequisites. End-to-end testing began in May 2015 and test claims were accepted through Aug. 14, 2015.

OVERVIEW

The testing process offered providers and their staff the opportunity to practice coding with ICD-10. Participants submitted "twin" claims for testing – one with ICD-9 codes and the other with ICD-10 codes. BCBSIL then processed both claims with the intention of taking all submitted and accepted test claims to a finalized status. For each finalized test claim, BCBSIL returned an 835 Electronic Remittance Advice (835 ERA). Participants also received testing summary results for each set of twin claims.

WHO PARTICIPATED?

BCBSIL testing participants included a number of clearinghouses and 113 providers (44 hospitals and 69 professional providers).

KEY FINDINGS OF THE TESTING PROGRAM

1. BCBSIL can successfully receive, process and return results for claims submitted with ICD-10 codes.

We successfully tested 4,850 ICD-9 and ICD-10 claims and were able to process claims to completion. This included FEP and local claims, as well as 22 specialties across three claim types: Inpatient (14%), Outpatient (31%) and Professional (55%).

2. Proper end-to-end functionality (837 acceptance to 835 remittance) was confirmed with 17 intermediary clearinghouses.

3. Coding behaviors seen between pairs of ICD-9 and ICD-10 are consistent with industry findings.

While most test claims showed no variance between ICD-9 and ICD-10, a small percentage of test claims showed differences that may be due to the added specificity of the ICD-10 code set, a different sequence of codes between ICD-9 to ICD-10, or coder interpretation of medical equivalence mappings.

TESTING SUMMARY

The test results were encouraging in light of the limited sample size and the number of providers and clearinghouses involved in the process. The end-to-end testing has indicated that systems at BCBSIL appear to be ready to accept and process ICD-10 claims. The end-to-end testing also indicates that major clearinghouses appear ready to handle ICD-10 claims appropriately. Additionally and according to feedback received during webinars and other outreach activities, participating providers found the testing process to be helpful in determining their readiness for the ICD-10 implementation.

Small Practice Alert

ICD-10 is really happening. It is a federal requirement that you comply, regardless of what kind of health insurance your patients have. If you haven't started getting ready, we urge you to take immediate action.

- Obtain ICD-10 coding manuals. Identify the ICD-9 codes you use most often currently and compare to ICD-10: What's the same? What's different?
- Talk to your practice management software vendor – have all updates been made?
- If you use a billing service and/or clearinghouse, talk with them, too – are they prepared to support ICD-10? If not, it may be time to find a new vendor.

LEARN MORE

The Centers for Medicare & Medicaid Services (CMS) offers readiness resources to assist you, such as their Roadto10.org site, CMS Quick Start Guide and a "Countdown to 10" video. For your convenience, we've added direct links to these resources in the Standards and Requirements/ ICD-10 section of our website at bcbsil.com/provider. Also see page 3 of this newsletter for information on types of training and other readiness resources.

**ICD-10
Special Edition**

Benefit Preauthorization Reminders

BCBSIL will accept ICD-10 codes beginning Sept. 21, 2015, for benefit preauthorization requests for services that will be rendered on or after Oct. 1, 2015. A benefit preauthorization submitted and approved prior to Oct. 1, 2015, with ICD-9 codes will not need to be resubmitted with ICD-10 codes. Prior to submitting a benefit preauthorization request, we encourage you to check eligibility and benefits through your preferred online vendor portal.

Quick tip: Start adding ICD-10 codes to referrals and orders for future services likely to occur on or after Oct. 1, 2015. The provider receiving your referral or order often relies on your diagnosis for their own billing. If you are not sure when the future service will occur, include both ICD-9 and ICD-10 codes on your request.

Join us for a webinar! For an overview of differences you may encounter when using ICD-10 codes in iExchange®, our online benefit preauthorization tool, please join us for an iExchange ICD-10 Enhancements webinar on Sept. 16, 2015, from 2 to 3 p.m., CT. To register online, visit the Workshops/Webinars page in the Education and Reference Center of our website at bcbsil.com/provider.

Please note that the fact that a guideline is available for any given treatment, or that a service has been preauthorized/pre-certified is not a guarantee of payment. Benefits will be determined once a claim is received and will be based upon, among other things, the member's eligibility and the terms of the member's certificate of coverage applicable on the date services were rendered.

Good Clinical Documentation = Good ICD-10 Coding

It all begins with you and your patient. This fact will not change with the transition to ICD-10. However, a higher level of specificity in your documentation will be necessary in many instances – such as documenting laterality – to support proper assignment of ICD-10-CM/PCS codes. To help ensure that claims are properly billed and appropriate benefits are applied, your documentation must paint a clear and complete picture of each patient's condition with details to support subsequent diagnoses and treatment.

Careful documentation also is important for auditing purposes, as the patient's health record helps demonstrate adherence to quality of care measures. Medical record data is used to help develop provider report cards and to demonstrate meaningful use in electronic health records. Provider profiles may be made publicly available through online transparency or comparison tools and potential patients may use this information when they are choosing where to go for care. Additionally, accurately capturing the severity of illness may ultimately affect case management index weighting and different forms of reimbursement.

In preparation for the transition to ICD-10 coding, many providers have implemented clinical documentation improvement (CDI) programs. In fact, ICD-10 is often used to justify the return on investment of expenditures on CDI programs and staff. Clinical documentation specialists (CDSs) may also be employed to assess current documentation practices and suggest opportunities for improvement. Some provider groups may have a physician champion on staff to help facilitate communication between CDSs and medical and clinical staff as well as to provide peer-to-peer support.

CDI is relevant to the facility setting, particularly when Medical Severity DRGs are determined. CDSs often understand the potential financial impact of complicating or comorbid conditions and major complicating or comorbid conditions and can help providers ensure that their documentation supports clinically complex diagnoses. CDSs also can help review the query process between coders and clinicians and/or develop templates to help physicians gather necessary components for accurate coding assignment.

Regardless of whether your organization or office has implemented a program, there are some basic CDI principles you can use to help make your documentation ICD-10-ready:

1. **Lay the groundwork** by outlining a complete history
2. **Go below the surface** by highlighting potential red flags and risk factors
3. **Include progress notes** to illustrate how the patient was monitored and evaluated
4. **Put the pieces together** with details on why decisions were made
5. **Focus on teamwork** between medical, coding and billing staff

If you need help, the American Health Information Management Association (AHIMA) has published a quick reference guide titled ICD-10-CM/PCS Documentation Tips on their website at <http://bok.ahima.org/PdfView?oid=300621>. Other clinical documentation improvement tools and services are widely available.

Types of Training: What's right for you?

There are generally three types of training that most provider organizations will need, as outlined below. Whichever training program(s) you choose, try to schedule the training so that it finishes at least a week or two before Oct. 1, 2015. This will help you make any final preparations necessary to start coding in ICD-10 for dates of service/discharge date of Oct. 1, 2015, and later.

Training for physicians and clinicians – This type of training is frequently offered according to provider specialty.

This type of program generally emphasizes how to document properly in the medical record so that trained medical coders can assign ICD-10 codes accurately. Training on ICD-10 code selection instruction also may be available.

Training for medical coders – This type of training is frequently offered according to provider specialty and emphasizes how to assign ICD-10 codes based on clinical documentation. Certified coders are required to have several hours of ICD-10 training to maintain their certifications. Certifications are generally specific to diagnosis codes (ICD-10-CM) or procedure codes (ICD-10-PCS) or both. All coders will need ICD-10-CM training, and inpatient hospital coders will need ICD-10-PCS training.

Training for practice managers and office staff – This type of training is less likely to be according to provider specialty. It typically focuses on more general topics, such as overall differences between ICD-9 and ICD-10, as well as preparing for challenges by developing strategies to overcome them. Some training may be specific to practice management systems, electronic health record (EHR) and/or clearinghouse system(s).

While BCBSIL cannot recommend or endorse any specific training program, we suggest you consider the following selection criteria to find an ICD-10 training program that is right for you or your practice:

1. Start with organizations where you already do business or with whom you have an affiliation.
 - If you are affiliated with a large medical group or hospital, ask if they have ICD-10 training available that you can attend or take online.

- If you use a practice management system, EHR, billing service or clearinghouse, ask if they have ICD-10 training available to customers. Many clearinghouses have negotiated discounts on ICD-10 training for their customers.

- If you are a member of a medical society or association, see if they are offering ICD-10 training to their members. Many have tailored training by specialty, and some offer discounted training to their members.

2. Next, look at professional medical coding associations, such as the American Health Information Management Association (AHIMA) and AAPC (formerly the American Academy of Professional Coders). These organizations have developed online and in-person training classes for specific job roles and specialties. General training information can be found at ahima.org and aapc.com. Also consider contacting the local chapters of these organizations (email or call a board member of a local chapter) and ask if they can send trainers to your location.

- For Illinois, there are three local chapters of AHIMA:
 - o Chicago Area – <http://www.ilhima.org/regional-associations/cahima-chicago/>
 - o Central Illinois – <http://www.ilhima.org/regional-associations/cihima-central/>
 - o Southern Illinois – <http://www.ilhima.org/regional-associations/silhima-southern/>

3. Lastly, there are many good online training programs available from other continuing education vendors, so we encourage you to look into additional options. Please note, however, that some vendors selling training services may only be offering an overview of ICD-10 that stops short of providing practical coding training. It's a good idea to research the parent company of vendors offering training to make sure they employ certified trainers and ask to see a training demonstration before committing to a purchase.

Are you ready?

BCBSIL has diligently worked to be prepared to meet mandated ICD-10 timelines and requirements. System and business process changes to accommodate transactions with ICD-10 codes have been implemented and we have successfully conducted testing with selected providers and clearinghouses. BCBSIL will begin accepting ICD-10 codes as of Sept. 21, 2015, for benefit preauthorization requests for services that will be rendered on or after Oct. 1, 2015. Valid ICD-10 codes must be included on claims submitted to BCBSIL for dates of service or inpatient discharge dates on or after Oct. 1, 2015. Claims without valid ICD-10 codes, as required, will not be accepted by BCBSIL. Additional information is available in the Standards and Requirements/ICD-10 section of our website at bcbsil.com/provider.

Online Resources Available for Claim Status

As a reminder, claim status is no longer available through the BCBSIL Interactive Voice Response (IVR) phone system. This change became effective July 13, 2015.

While our Customer Advocates remain available to discuss claim adjustments and other inquiries, BCBSIL supports electronic options as the most convenient, efficient and secure choice for requesting claim status information by independently contracted providers.

When conducting online transactions, you will need to use an electronic vendor portal. Some electronic vendors, such as Availity offer online tools for enhanced claim status, payment and remittance information. Following are two online tools available to registered Availity users:

- **Claim Research Tool** – offers enhanced, near real-time claim status functionality to help you manage and research your BCBSIL claims. This online tool allows you to search for claims by Member ID, group number or Document Control Number (DCN). You can customize your search to view claims according to status (paid, pending or denied) or by a particular date range and obtain detailed line item information (amount paid, ineligible reason code and description for each service line). It also enables you to check the status of multiple claims in one view.
- **Remittance Viewer** – offers providers and billing services a convenient way to view and help reconcile claim data provided by BCBSIL in the 835 Electronic Remittance Advice (ERA).

For more information on these and other electronic options available to BCBSIL contracted providers, visit the Education and Reference Center/Provider Tools section on our website at bcbsil.com/provider.

For answers to frequently asked questions (FAQs) concerning the above-referenced change, refer to the IVR Claim Status Change FAQs in the Claims and Eligibility/Claim Adjudication section of our website at bcbsil.com/provider. A Claims Caller Guide also is available to assist you with navigating menu options on the IVR system.

If you would like to schedule a training webinar to learn more about online resources for claim status and other requests, email our Provider Education Consultants at pecs@bcbsil.com.

Fairness in Contracting

In an effort to comply with fairness in contracting legislation and keep our independently contracted providers informed, BCBSIL has designated a column in the *Blue Review* to notify you of any significant changes to the physician fee schedules. Be sure to review this area each month.

Effective Aug. 1, 2015, the following code ranges were updated: 90653-90688 and Q2034-Q2038. Please note that not all codes in these ranges were updated.

Effective Aug. 15, 2015, codes 77063 and G0279 were updated.

Effective Oct. 1, 2015, code S1090 will be updated.

The information above is not intended to be an exhaustive listing of all the changes. Annual and quarterly fee schedule updates can also be requested by using the Fee Schedule Request Form. Specific code changes that are listed above can also be obtained by downloading the Fee Schedule Request Form and specifically requesting the updates on the codes listed in the *Blue Review*. The form is available in the Education and Reference Center/Forms section of our website at bcbsil.com/provider.

BCBSIL to Host a Payer-specific Overview of the Availability Web Portal

Before, during and after the claim submission process, electronic options are available to help make it easier for you to conduct business with BCBSIL. For most electronic transactions, you will need to enlist the services of a vendor portal for the secure exchange of your patients' protected health information. Using an online vendor portal can enable providers to obtain fast, efficient and detailed claims data for BCBSIL members. Since there are many vendors to choose from, we encourage you to shop around.

Our Provider Education Consultant team is hosting **BCBSIL Back to Basics: 'Availability 101'** webinars to provide an overview of several electronic options, using the Availability Web Portal as one example of a vendor to consider. In addition to supporting standard electronic data interchange (EDI) transactions, the Availability Web Portal offers special resources for BCBSIL participating providers, such as the Claim Research Tool. General training is offered on the Availability website; however, it's important to understand payer-specific details.

During each one-hour **BCBSIL Back to Basics: 'Availability 101'** webinar, we'll discuss the following:

- Registration for new users
- Gaining access and general navigation
- How to conduct eligibility and benefits requests
- Quick preview of the Claim Research Tool
- Other tools available to BCBSIL contracted providers
- How to obtain additional training

SIGN UP TODAY

To register, visit the Education and Reference Center/Workshops and Webinars section of our website at bcbsil.com/provider. You do not have to be a registered Availability user to attend.

We are currently experiencing technical difficulties with the registration function for some of our online training sessions. If you encounter any issues when trying to register online, please proceed as follows:

- Make note of the date and time of the session you would like to attend.
- On the day of your selected webinar, go to the Workshops and Webinar page on our Provider website and click on the date and time for your session.
- The option to register may or may not appear. You may be required to register to proceed.
- The "Join" button will become active at the scheduled start time of your meeting.

If you have questions or would like to request personalized training for your office, email our Provider Education Consultants at pecs@bcbsil.com.

Checking eligibility and/or benefit information is not a guarantee of payment. Benefits will be determined once a claim is received and will be based upon, among other things, the member's eligibility, any claims received during the interim period and the terms of the member's certificate of coverage applicable on the date services were rendered.

Out-of-area Member ID Card Reminder: 'Blue Choice' Name

You may see various combinations of the words "Blue Choice" on **any** member ID card as part of the plan, product or network name. You may also encounter these terms when verifying eligibility and benefits. The Blue Choice name on out-of-area Blue Plan member ID cards has nothing to do with the BCBSIL Blue Choice network.

Remember, out-of-area Blue Plan members with PPO coverage have access to **all** PPO contracted BCBSIL providers as part of our BlueCard® Program. Out-of-area member benefits are determined by the member's Home Plan.

For services deemed eligible for benefits, claims will be processed for possible reimbursement according to your BCBSIL PPO provider contract. For additional information, refer to the Quick Guide to Blue Cross and Blue Shield Member ID Cards, located in the Standards and Requirements/BlueCard Program section of our website at bcbsil.com/provider.

Verification of eligibility and/or benefit information is not a guarantee of payment. Benefits will be determined once a claim is received and will be based upon, among other things, the member's eligibility, any claims received during the interim period and the terms of the member's certificate of coverage applicable on the date services were rendered.
