The physical medicine utilization management program is not a substitute for the independent medical judgment of a health care provider. Health care providers are instructed to use their own best medical judgment based upon all available information and the condition of the patient in determining a course of treatment. Regardless of any benefit determination, the final decision regarding any treatment or service is between the patient and the health care provider. Please note that the fact that a guideline is available for any given treatment, or that a service has been preauthorized, is not a guarantee of payment. Benefits will be determined once a claim is received and will be based upon, among other things, the member’s eligibility and the terms of the member’s certificate of coverage applicable on the date services were rendered. If you have any questions, please call the number on the back of the member’s ID card.
