HMO 90-Day Supply Prescription Drug Program

The 90-day supply prescription drug program can save you both time and money. With this program, State of Illinois members can get up to a 90-day supply of long-term (or maintenance) medicine through a network of retail or home delivery service pharmacies.

As a State of Illinois HMO member, you have a choice of generic, preferred brand or non-preferred maintenance medications. Maintenance medications are those drugs you may take on an ongoing basis to treat conditions such as high cholesterol, high blood pressure or diabetes.

Please refer to your plan coverage documents for the copayment amount for a 90-day supply of covered medicine. Using a generic or preferred brand medicine, when right for you, may save you money.

Select categories of medications may be available for a lower copayment amount when used for maintenance purposes. You can find a sample list of these types of drugs at bcbsil.com/stateofillinois.

Visit bcbsil.com/stateofillinois to find an in-network retail or home delivery service pharmacy convenient for you. Log in to **Blue Access for MembersSM** and click **Pharmacy** for pharmacy information.

To Purchase Your Long-Term Medicine at a 90-day Retail Pharmacy

1. Ask your doctor for a prescription for up to a 90-day supply of each of your long-term medicines.
2. Take your prescription or have your doctor submit it electronically to an in-network retail pharmacy.

To Purchase Your Long-Term Medicine Through a Home Delivery Service Pharmacy

1. Ask your doctor for a prescription for up to a 90-day supply of each of your long-term medicines.
2. If you need to start your medicine right away, ask for a prescription for a one-month supply to take to a retail pharmacy.
3. You can order online, through a mobile device, over the phone or through the mail. To print a new prescription order form and mail it, go to bcbsil.com/stateofillinois, log in to BAMSM, click **Support** at the top and select **Forms and Documents**.
4. You can send your prescription with your order form. Or, ask your doctor to fax or send your prescription electronically to the home delivery service pharmacy. Be sure to complete and submit the mail order form to avoid a delay in processing your order.
5. If mailing your order, send your prescription, completed order form and payment to the home delivery pharmacy.
6. Medicines take about five business days to deliver after the mail service pharmacy receives and verifies your order.

If you have questions about the HMO 90-day supply program, call the pharmacy program at 800-423-1973.
