Preferred Maintenance Drug Benefit Program

Introduction

Blue Cross and Blue Shield of Illinois (BCBSIL) administers the preferred maintenance drug benefit for your group's health plan. Coverage for these medications is subject to your prescription drug benefit plan.

This guide lists some examples of drugs that are commonly prescribed for maintenance purposes.

Coverage of all medications is still subject to your plan limits, exclusions and out-of-pocket requirements (for example, your prescription drug payment levels).

Coverage of some medications or drug products may be covered under your medical benefit. Coverage for medications will be at in-network pharmacies in the HMO Network: \$4 copay for a 30-day supply; 90-day supply will be based on your benefit plan. See your benefit booklet for details.

The preventive drug program currently includes prescription drugs in the following categories:

- Anticoagulants/antiplatelets
- Bowel preparation
- Breast cancer primary prevention
- Contraceptives
- Depression
- Diabetes medications
- Diabetic supplies
- Fluoride
- High blood pressure
- High cholesterol
- Osteoporosis
- Respiratory
- Tobacco cessation

The drugs in each category are listed alphabetically on the following pages.

- Generic drugs are listed in **bold**.
- Brand drugs are listed in all CAPITAL letters.
- Some strengths and/or formulations may not be covered.
- Brand names in parenthesis are listed for reference and are not covered under the benefit.

REMEMBER: Just because a drug is on the preventive drug benefit list, doesn't always mean it is covered. Coverage of all medications is still subject to your plan benefits. Please see your benefit plan materials for coverage details, or call the number on your member ID card.
